said step of providing information about processor activity includes providing [information that the processor has not executed an instruction during the the processor cycle] an indication every time the processor stalls that the processor has stalled; and

said step of providing information about processor activity includes providing information about every instruction executed by the processor.

REMARKS

Claims 1-21 and 24-27 are pending in the application. Claims 1-20, 26, and 27 are allowed. Claims 21, 24, and 25 are rejected.

The typographical error in line 9 of claim 21 has been corrected by this amendment.

Claim 21 stand rejected under 35 U.S.C. §112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject which applicant regards as the invention. The Examiner believes that the language "information that the processor has not executed an instruction during the the processor cycle" is unclear.
